

China’s AI: Empowering Smart Development for Global South Partners

The China-SCO Countries AI Application Cooperation Center

We are ready to build with all sides the artificial intelligence application cooperation center, and share the dividends of progress in AI.
2025.09
SCO Tianjin Summit · Initiative first proposed
2026.07
WAIC · Center officially established
Coordinated by the NDRC · guided by the Beijing Municipal DRC · built by Haidian District

Global AI is entering a pivotal leap of paradigm shift and landscape restructuring

01 Technology Paradigm

Race for parameter scale → systematic breakthroughs in AI agents

Model iteration down to weeks · AI agents as a digital workforce · embodied AI reaching into the physical world

02 Industrial Landscape

Single-point tech empowerment → full-chain AI-native

Full-chain systemic rivalry · cluster-based competition · deep AI integration into manufacturing, healthcare and research

03 International Competition

Contest for tech leadership → systemic strategic rivalry

Tighter controls on high-end chips and computing power · open- vs closed-source competition · governance rules and standards in deep water

Tech iteration, industrial transformation and international rivalry all deepen in parallel, AI becomes a key variable reshaping national core competitiveness

Beijing · Haidian

China's strongest AI industrial base and densest AI talent hub

RMB 450 Billion

Beijing's AI core industry scale (approx. RMB 450 billion in 2025)

2500+

Beijing AI core enterprises (Large models, embodied AI, AI chips)

Nearly 80%

Haidian's share of Beijing's core AI output, 30% annual growth

12,300

AI experts in Haidian, 135 AI2000 top scholars

- **The source of China’s AI innovation resources**
- **A complete chain from foundation models to open-source ecosystems, large-model applications and embodied AI**
- **The first AI cluster among China's national advanced manufacturing clusters**
- **Peking University, Tsinghua University, CAS, BAAI, BIGAI and other new research institutions gathered here**

Built on national-level AI industrial park — Zhongzhi Park

A global platform for international AI cooperation and governance

Zhongzhi Global Building

2F Beijing AI International Lounge
1F Beijing AI Exhibition Hall

- ✓ National source for independent AI innovation
- ✓ National platform for a full-stack intelligent computing industry chain

Tech-Scenario Alignment

Standards & Governance

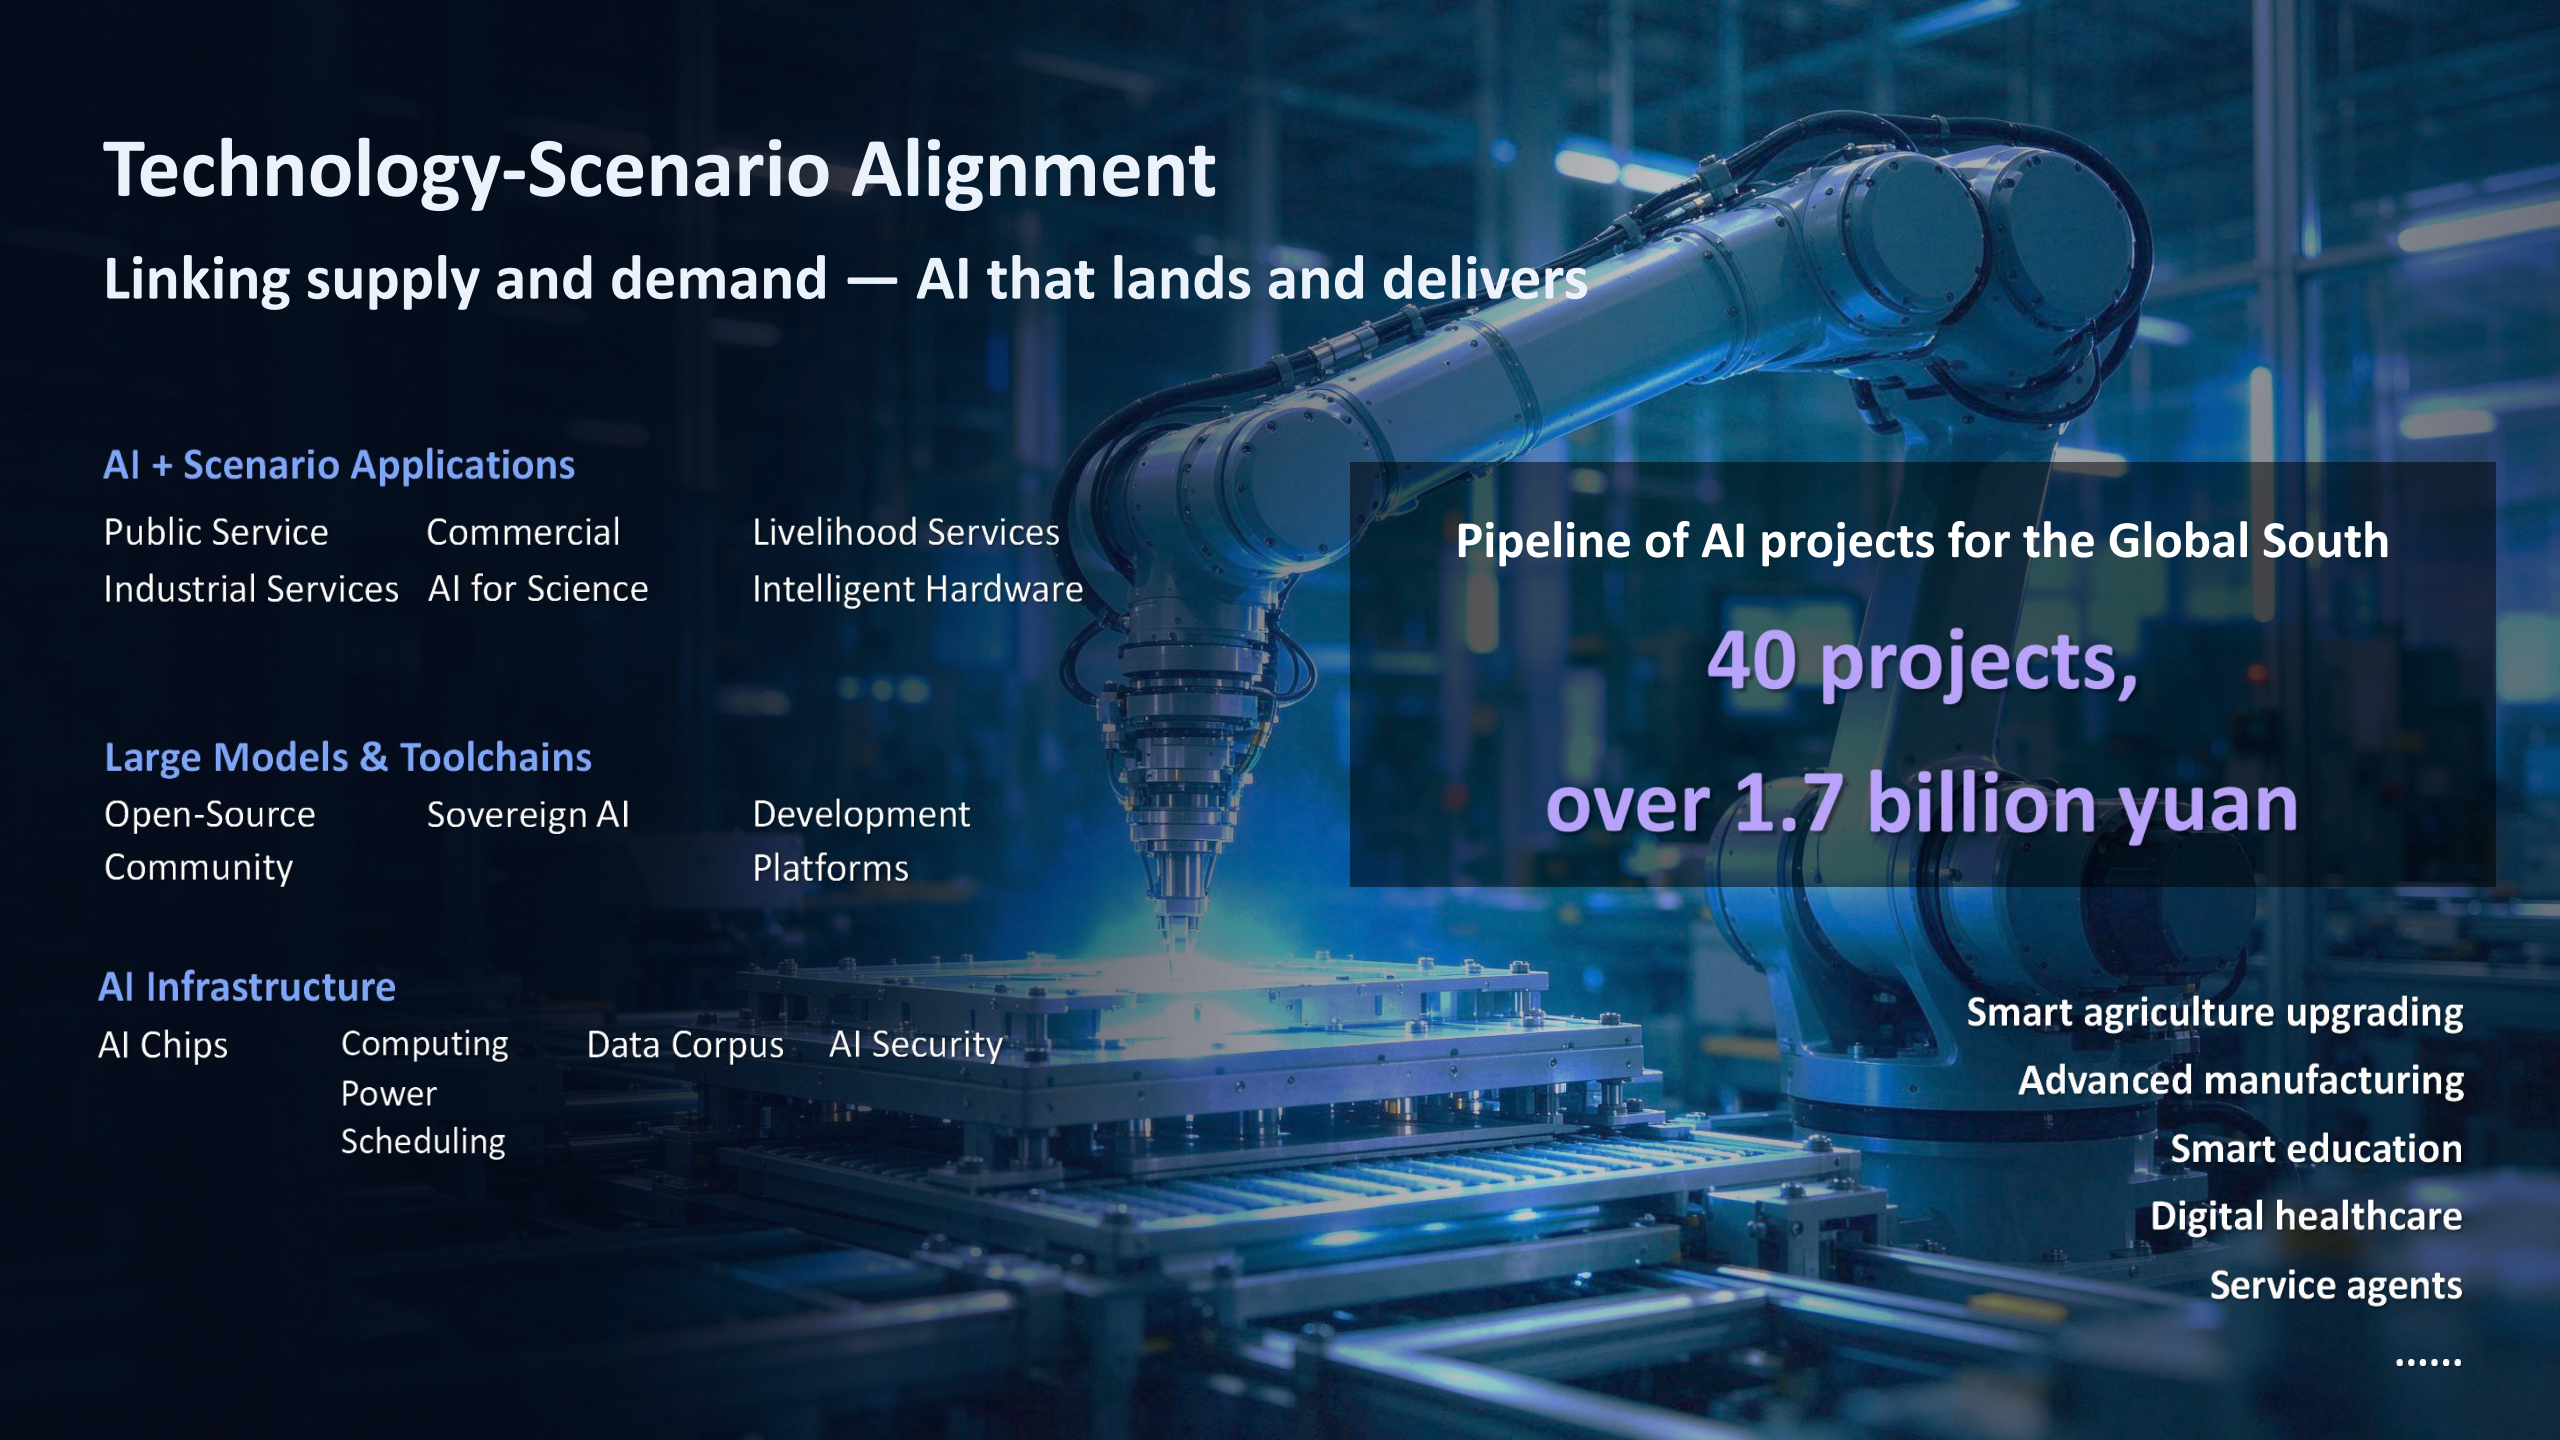

Talent Development

International Dialogue

Resource sharing · capacity building · standard alignment

Technology-Scenario Alignment

Linking supply and demand — AI that lands and delivers

AI + Scenario Applications

Public Service
Commercial
Livelihood Services
Industrial Services
AI for Science
Intelligent Hardware

Large Models & Toolchains

Open-Source Community
Sovereign AI
Development Platforms

AI Infrastructure

AI Chips
Computing Power Scheduling
Data Corpus
AI Security

Pipeline of AI projects for the Global South

40 projects,

over 1.7 billion yuan

Smart agriculture upgrading
Advanced manufacturing
Smart education
Digital healthcare
Service agents
.....

Standards & Governance Alignment

Building inclusive and mutually recognized global AI rules

Joint research with governments, universities, research institutions and international organizations

AI Safety

AI Ethics

Data Privacy & Cross-border Data Flows

Algorithmic Transparency

Standard Alignment

White Paper on Development of Global Sovereign Large Models

Jointly released with industry alliances from seven countries

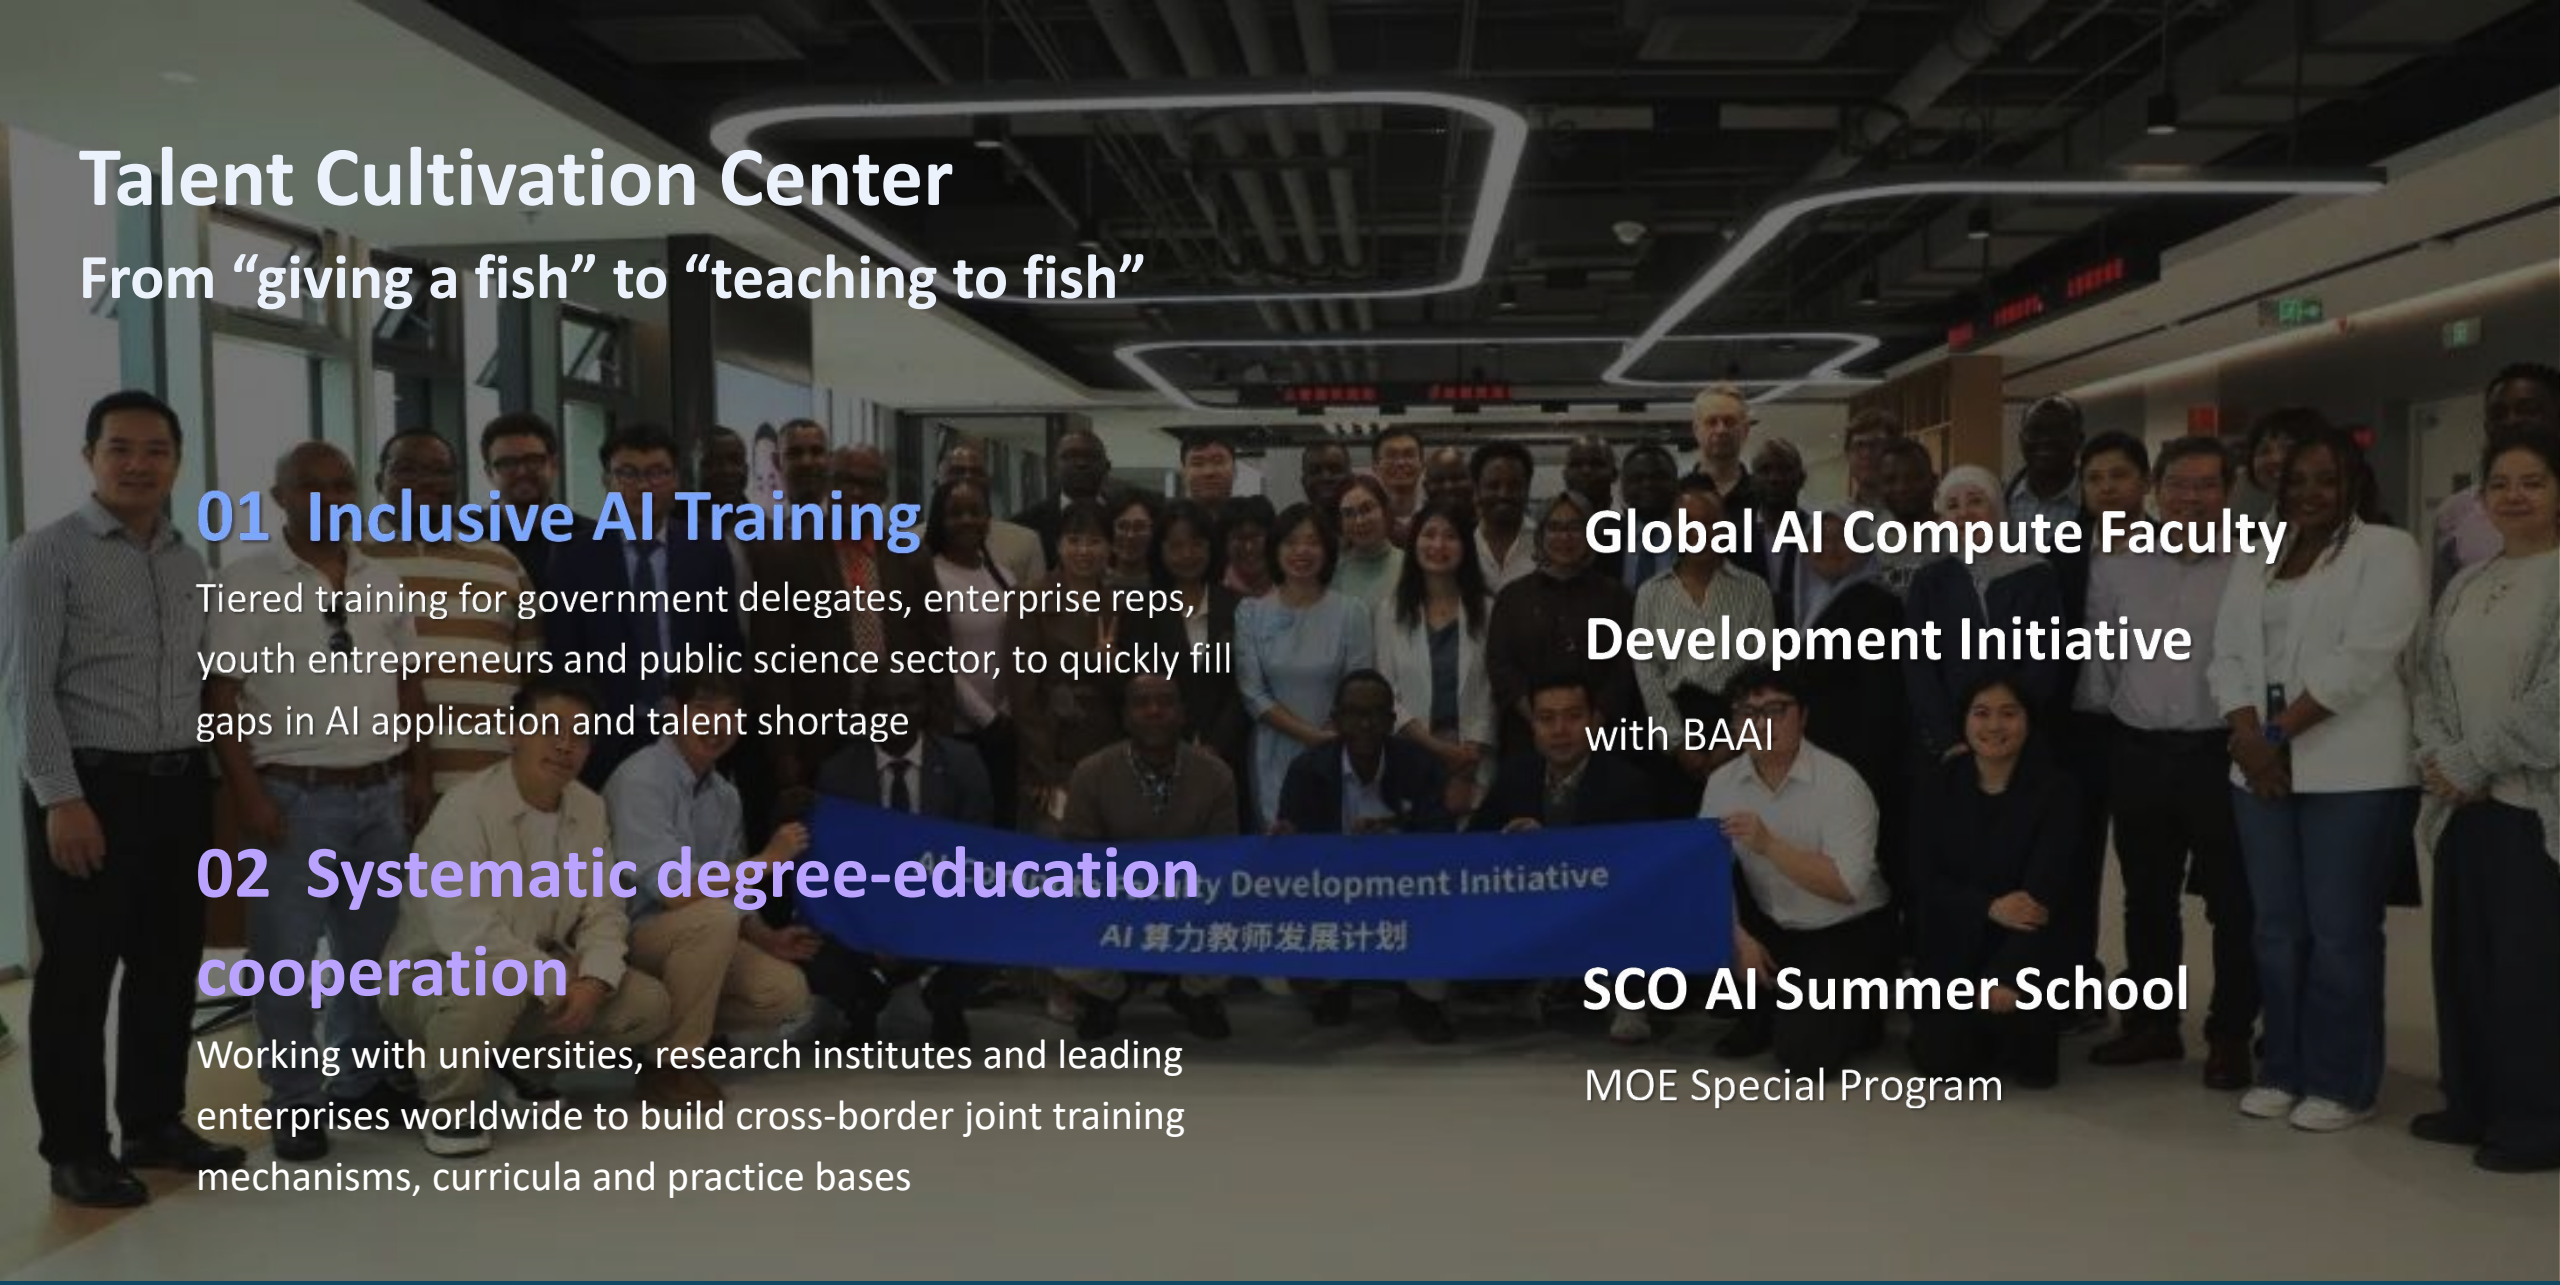

Launching Global Youth Initiative

Co-hosted with Renmin University of China

Talent Cultivation Center

From “giving a fish” to “teaching to fish”

01 Inclusive AI Training

Tiered training for government delegates, enterprise reps, youth entrepreneurs and public science sector, to quickly fill gaps in AI application and talent shortage

02 Systematic degree-education cooperation

Working with universities, research institutes and leading enterprises worldwide to build cross-border joint training mechanisms, curricula and practice bases

Global AI Compute Faculty Development Initiative

with BAAI

SCO AI Summer School

MOE Special Program

Training sessions (2026 Apr–Oct): 14 sessions / 600+ participants

Intl delegations: hosted 14 batches / 225 participants

High-level Dialogue and Open Platform

Building Global South AI innovation consensus

- High-level dialogues, thematic forums and project roadshows
- Establishing regular, multi-level cooperation mechanisms
- Connecting enterprises with international organizations and governments

Nearly 1,000
delegates

62 countries & regions

AI Party Night co-hosted with Tsinghua University

UN System in China
Zhongguancun AI Cooperation Dialogue

High-level forum under CIDCA

“We are ready to build with all sides the artificial intelligence application cooperation center, and share the dividends of progress in AI.”
